Setting up Grammarly

Go to https://www.grammarly.com/enterprise/signup

1. Log in to an existing Grammarly account, by clicking Log in in the upper-right corner of the page, or create a new account. You must use your Southeastern Technical College email when setting up your account.
2. Check your inbox for a confirmation email and follow the link in the email to verify your account.
3. Enter the access code provided by your institution, **aPUnpKzzkTTOaULM**
4. Once you've confirmed your email, enjoy access to Grammarly Premium in all of our product offerings.

If you're not getting the confirmation email, try the following:

1. Check your spam or junk folder and any tabs in your inbox.
2. Try adding these email addresses to your email contact list and then send yourself a confirmation email again:
    info@em.grammarly.com
    info@send.grammarly.com
    donotreply@grammarly.com

Please note: Sometimes Grammarly emails go to quarantine (spam). Log into https://protection.office.com with your student email credentials. Click on Threat Management and then Review. You may need to click between Spam and Bulk for it to refresh the list of emails.

Grammarly's product offerings
Grammarly offers applications for Windows and for Mac that work where you do. This includes:

Microsoft Office suite (Word and Outlook).
Hundreds of desktop native apps (Slack, Discord, and Apple Mail, among others).
All of your favorite web apps (Gmail, Confluence, Jira, Salesforce, Sheets, and Hubspot, among others).
Note: Grammarly for Windows and Mac support Windows 10 and all macOS versions starting from Sierra (10.12). They will not run on older OS versions.

You can also check your writing using the Grammarly Editor.

 On mobile devices, you can install:

Grammarly for iPhone, which offers the option to access the Grammarly iPhone Editor on your mobile device and check your writing using the Grammarly Keyboard and the Grammarly browser extension for Safari.

Grammarly for iPad, which allows you to access the Grammarly iPad Editor directly from your iPad and check your writing using the Grammarly Keyboard and the Grammarly browser extension for Safari.

The Grammarly Keyboard for Android, which helps ensure everything you write on mobile is mistake-free.
